USAGE;

Our product is very easy to use; As with standard couplings, We don't need to remove the nuts and pipe holder ring. After loosening the nuts of the product you bought as a group 3-4 turns we attach it directly to the pipe and tighten the nuts.

15

ADVANTAGES;

- 1) We do not need to chamfer the pipe.
- 2) We do not need to remove the nut and pipe holder ring as with standard couplings
- 3) Through to the patented working principle, It can be easily used in pipes produced in wider tolerance range.
